Environmental Standards and Practices User Guide, Section 13: Air, December 2006. Ministry of Transportation Ontario.

### **Comments and Suggestions**

The Ministry of Transportation welcomes comments and suggestions on ways to improve the document with the objective of providing a practical and pragmatic approach to environmental management in the Province of Ontario. MTO anticipates that changes will be warranted to clarify, improve and incorporate new information. The format of the document is designed to accommodate such changes. Such revisions and amendments will be incorporated in later editions of this document. MTO will not formally respond to unsolicited comments submitted in response to the document.

## **1 PREFACE**

The Environmental Standards and Practices User Guide (the User Guide) provides guidance to design teams and information to stakeholders on how the ministry approaches typical environmental impact issues in order to meet its Environmental Protection Requirements through the Environmental Assessment (EA) Process.

The process and procedures for the assessment of air impacts during highway design and assistance to the user in the determination and mitigation of impacts is under internal development at MTO and is currently being managed on a project by project basis.

When developed, the impacts and management options will be included in this section.
